### REGULATORY VALIDATION & EXEMPTION MANAGEMENT

Validates your device compliance with D-017 requirements and tracks / recommends exemptions at every stage, including calibrations, inspections, and proves.

### KEY PERFORMANCE INDICATORS : LEADING WITH DATA

Provides regulatory and cost KPIs that empower informed decisions, allows for quick rectification of compliance gaps, and facilitates risk quantification—ultimately, helping balance compliance costs with risk and operational value.

### DIGITAL QR CODE TAGS AND GEO-LOCATION

Improves data accuracy with QR-code-based device tags and geolocation, while allowing for secure and real-time access to device records and asset tracking through geo-location.

### DATA INTEGRATION

Integrates with maintenance management systems such as Maximo
